Highly Recommended to play with Friends.. Within my 22 minutes of gameplay it crashed 6 times and when it didn't crash it was almost unplayable. Cool concept, awful implementation.. All those 'realistic' tank games have gotten it completely wrong. This is how tanks really work.. Hell, I love the idea of this game and I've been following it for forever, but I cant recommend it in its current state. Unfortunately the fact that they have multiple game modes but most of the time the round is over within seconds so you don't even get to enjoy it is a big con. I'd love to see fully destructable maps with the "last person left alive" with some barriers and such to have games last more than 30-60 seconds, and maybe span even up to 3-5 minutes with intense rounds. I'd say definitely buy this if you've got a group to play with though, I'm sure once you get the hang of it and you have controllers to play with it'd be a blast, but just not for me unfortunately. (Controller support has been fixed as the developer comment says, they're also working on Gamemodes.. PS4 controller works but Steam controller doesn't. On local battle, keyboard doesn't work. That it was bomb, but.. I first played this game at Gamescom. After that i followed it for a while. The devs are very active and listen to their community. This game is perfect for chill evenings with friends. The controls are a bit tricky, but if you play it for a while you can get very good at it. I really like Tiny Tanks. Rounds can end in 10 seconds or you can fight until the whole map is a mess. Yeah, it's "very" early access, yeah, there are bugs. If you play with people from across the world you will encounter warping. Give the devs a little more time and this game will be a must have for every gaming night.. This game is great! While it features a robust online matchmaking system, the game itself is much more akin to couch co-op play than online multiplayer. (Compare it to Gang Beasts if you need an idea of what I'm talking about) The gamemodes are a lot of fun. Each round is fast-paced and flies by quickly, with enough variety to keep things interesting. The modes are all unique and enjoyable, and the gameplay itself is frenzied and excellent. Since the game is still in Early Access, I'll leave some of my suggestions for what could be improved: 1: Better Matchmaking setups. adding more customization options for how the games play out would be much improved. Stuff like being able to choose the order of the modes played or more modifiers outside of one could easily spice up gameplay for those who found it boring. 2: More options for the stage editor. Don't get me wrong, I love the stage editor. But being able to better fine-tune block placement (especially along the z-axis) or adding a few other blocks could easily make improvements to an already-great system. 3: more hats. Nothing really to complain about here, just love the idea of having more.. Very polished for an early access game. Highly Recommended to play with Friends.
